Mafalda Veloso CUSTOMER JOURNEY

Mafalda gets gifted a dealership by her father.	Mafalda realizes that she **needs a loan** to buy luxury cars for her dealership and to get the business going.	Mafalda opens the bank website to **simulate a loan**, giving details about what she wants, such as loan duration and amount.	**Authentication via facial recognition** is required to complete the loan application.	Mafalda gives the rest of the **required information** to the bank, such as average of last three earnings and expenses.	The information is sent to a **system** that will decide whether to **approve or reject** her loan, **or request an interview**.	**Mafalda is notified**, via SMS or email, depending on her preference, that the status of her loan has been changed.	Mafalda accesses her account, via **facial recognition**, and checks the status of her loan. She sees that it was changed to **Pending** and that there are slots for interviews that she can choose from.	Mafalda chooses one of the **time slots** available for the interview.	Mafalda drives in her Porsche to the bank to do her interview.	Mafalda goes to the loan officer's office to do her interview.	The loan officer makes a decision and **updates the status** of the loan request.	A **notification is sent that the decision is available in the application**, via SMS or email, to Mafalda.	Mafalda can see in the application that her **loan has been accepted**.	Mafalda is thrilled that her loan has been accepted.	Mafalda **fills out a questionary** provided by the bank regarding her experience with her loan process.	Mafalda now gets to buy the cars to fill her dealership and to start the business as soon as possible.
