Pedro Coutinho CUSTOMER JOURNEY

Pedro logs in to the bank **via facial recognition** to request a loan to the apartment they see themselves living in.	He then enters valuable information such as **average last three earnings** and **expenses.**	The **bank's system processes the necessary information** that the user has uploaded and the credit score isn't optimal, so an interview is required.	Pedro receives the **information via SMS** that the status of his loan request has been updated.	Pedro logs in to his account, via **facial recognition,** and sees that his loan is **Pending;** he also sees the available slots for the interview that was requested and he chooses one.	Pedro is now a bit worried as he has to be interviewed and starts thinking what could go wrong.	Pedro is now **driving to the interview** with the car that the promotion has given him access to.	The **car has a mechanical error** making it so he misses the Interview.	Pedro explains the situation to the loan officer who sympathizes with the situation and reschedules the interview on the spot to the next week at the expected time.	The interview happened and the **loan officer is a bit skeptical on whether to accept or decline**, so he informs Pedro that **the change in the decision will be communicated via SMS.**	Pedro receives the information via SMS that the loan decision has changed and he needs to check the website.	Pedro logs in to the website, using facial recognition, and verifies that the **loan has been accepted.**	Pedro **fills out a questionary** provided by the bank regarding his experience with hisloan process.	The family now lives in a new apartment in their desired place.
