Pedro Coutinho CUSTOMER JOURNEY

Pedro gets promoted in his company by his boss and his salary gets a huge bump.	A few months go by and Pedro's wife has their son.	Pedro starts **looking for a bigger apartment** so his family can more comfortably live without worrying with space, thinking of the possibility of another child being conceived in a few years.	Pedro accesses the loans page on the bank website, **using the simulator section.**	While on the website, he ponders on the most optimal loan amount considering his family's most recent expenses, taking into account the birth of the baby.	Pedro logs in to the bank **via facial recognition** to request a loan to the apartment they see themselves living in.	He then enters valuable information such as average last three earnings and expenses.	The **bank's system processes the necessary information** that the user has uploaded and promptly accepts his loan request without a need for interview.	Pedro receives the information via SMS that the **loan decision has changed** and he needs to check the website.	Pedro logs in to the website, using **facial recognition**, and verifies that the loan has been accepted	Pedro **fills out a questionary** provided by the bank regarding his experience with his loan process.	The family now lives in a new apartment in their desired place.
