## OVERVIEW

Mafalda Veloso is a 27-year-old data scientist for F1, based in Monaco-Ville. Her career has started not long ago, but she has been able to become one of the top data scientists in the company. Seeing that she has a passion for cars, she decided she wanted to open up a luxury car dealership in Porto. Her dad has already bought her the dealership, but she needs a loan to buy luxury cars to sell.

## GOALS

Mafalda Veloso aims to establish a premier luxury car dealership in Porto, focusing on delivering an exclusive shopping experience for affluent customers. Her primary goal is to curate a selection of top-tier vehicles.
To realize this vision, Mafalda seeks a loan to finance a diverse inventory of luxury cars.
Long-term, Mafalda envisions her dealership as a community hub for car enthusiasts, hosting exclusive events that celebrate luxury automotive culture. Through this approach, she aspires to create a distinguished brand in Porto's luxury car sector.

## MAIN FRUSTRATIONS

Securing a loan to purchase luxury vehicles is a significant hurdle for Mafalda. Navigating the complexities of financial institutions and meeting their requirements can be frustrating, especially as a new business owner.
